## Experience

### Software Engineer
Pomelo
Apr 2024 - Present (2 months)

### Ssr. Full-stack Developer
Nubi
Jan 2024 - Mar 2024 (3 months)
Nubiz is a corporate solution for employee benefits
with managed prepaid cards.

- Developed internal and end-user management web applications with React.js.
- Translated Figma designs into user-friendly interfaces.
- Helped backend engineers develop services with Node.js.
- Suggested and implemented best practices and code refactors in newly created projects.

### Jr. Full-stack Developer
Nubi
Apr 2023 - Dec 2023 (9 months)

### Software Developer
Freelance
Mar 2022 - Mar 2023 (1 year 1 month)

### Software Developer Apprentice
Alkemy
Jan 2022 - Mar 2022 (3 months)
Participated in a front-end development apprenticeship, working closely with a senior engineer.

- Helped build a new website for a non-profit organization (ONG).

- Received mentorship from an experienced senior engineer, gaining insights into industry best practices. This improved my programming skills and instilled a commitment to coding cleanliness and efficiency.
